-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Election/Restrictions*

1. Applicant's response of 07/29/2005 is acknowledged. However, upon further review, the election of species requirement dated 06/27/2005 is withdrawn and replaced with the following:

2. This application contains claims directed to the following patentably distinct species:

Specie 1 corresponding to figure 4. The claims reading on specie 1 are 1-10.

Specie 2 corresponding to figure 10. The claims that read on specie 2 are 11-18.

Specie 3 corresponding to figure 27. The claims that read on specie 3 are 70-84.

Specie 4 corresponding to figure 28. The claims that read on specie 4 are 19-24.

Specie 5 corresponding to figure 74. The claims that read on specie 5 are 60-67.

The species are independent or distinct because in specie 1 foreground objects are adjusted by a normal equation by the least square method that is different from specie 2. Specie 3 (figure 27) has a different method for motion blurring adjustment than figure 4. Specie 4 shows still/movement decision means, which is one of the embodiments for block 103. Specie 5 corresponds to a pressure area sensor 501 that is a different sensor compared to a light sensor.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 25-45, 51-58, 68, 69 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2622

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
